About Elecbits

Elecbits is a tech-enabled B2B platform that helps Electronics Enterprises to go from an idea to a shelf ready, commercial Electronics Product. We cover the end-to-end intricacies involved in the Electronics product development & manufacturing cycle using 25+ micro-services on our platform.

We are proud to have worked with more than 100 eminent enterprises, digitizing their product development and manufacturing lifecycle. Some notable names are Ola Electric, Urban Company, Maruti Suzuki, Bosch, V-guard, Luminous, Phone pe, Escorts Kubota, Napino, etc. We are the largest B2B Electronics development and manufacturing platform of its kind, having more than 3000 global Electronics manufacturers and suppliers on our platform.

Hiring for FullStack Developer at the fastest growing EMS company.

Responsibilities -

- Collaborate with cross-functional teams, including designers and product managers, to gather requirements and translate them into technical solutions.
- Develop scalable and efficient web applications using the MERN (MongoDB, Express, React, Node) stack.
- Write clean, maintainable, and reusable code in TypeScript and JavaScript.
- Implement responsive user interfaces using Tailwind CSS and Material UI.
- Collaborating with UI/UX designers and developers.

- Integrate third-party APIs and services into the application.
- Conduct code reviews, identify and fix bugs, and optimize application performance.
- Participate in the entire software development lifecycle, from concept and design to testing and deployment.
- Stay updated with emerging technologies and trends in web development.

The ideal candidate key requirements-:

- 0 - 1 years of proven work experience in Software development.
- Strong proficiency in TypeScript and JavaScript.
- Experience with the MERN (MongoDB, Express, React, Node) stack.
- Proficiency in front-end development using libraries like Tailwind CSS and Material UI.
- Knowledge of React Query is a plus.
- Strong knowledge of React hooks and best practices of development.
- Knowledge of HTML, CSS, and front-end technologies.
- Familiarity with RESTful APIs, database design and implementation using MongoDB.
- Understanding of version control systems, preferably Git.
- Strong problem-solving and analytical skills.
- Excellent communication and collaboration skills.
- Ability to work independently and in a team environment.
- Attention to detail and a focus on delivering high-quality code.
- Prior experience in an agile development environment is a plus.

Nice to have Skills-:

- Independent and able to work as a team player.
- Excellent communication and interpersonal skills.
- Capable of adhering to time limits.
- Ability to work under pressure.

Why Join Us?

- **No self-imposed limits:** We encourage you to push your boundaries and reach your full potential.

- **Disrupting the electronics industry:** We're at the forefront of innovation and change.

- **Energized environment:** Our company's energy fuels growth and self-improvement**.**

- **Good vibes only:** We foster a positive and supportive atmosphere for all.
